Designer/Planner Position

Posted June 1, 2016

Our practice in trail and active transportation projects in California is growing and has unlimited potential. We seek a person with broad planning and design skills and interests who is passionate about connecting people to nature and active transportation options to play a key supporting role.

TrailPeople offers the opportunity to work on interesting and challenging projects in scenic locales; socially and environmentally beneficial work; broad involvement in marketing and project efforts; and unequalled opportunity to learn, take on responsibilities and increase earnings, including potential partnership/ownership position.

Requires at least two years of prior professional experience in planning and design relevant to bicycle and pedestrian facilities, complete streets, and trails for recreation and transportation, such as:

- Technical report writing and research
- Regional and site mapping and analysis (using GIS)
- Site and project design at master plan, preliminary design and construction document stages (using CAD)
- Graphic illustration including photosims, 3D models, plans, cross-sections, elevations
- Support of public and stakeholder outreach, engagement, and input

Requires solid capability in at least some of the following platforms:

- MS Office suite
- ArcGIS
- AutoCAD
- Adobe Illustrator
- Photoshop
- Sketchup

Requires undergraduate degree in Landscape Architecture, City and Regional Planning, Civil or Traffic Engineering or related field. Master's degree in related field highly desirable.

Hours are flexible – could be part time initially, or full time, subject to needs and negotiation. Pay is \$30/hour or more depending on qualifications. Potential is there to earn well above \$100K/year within a few years. If interested please email brief intro, resume, and work samples. NO CALLS OR DROP-INS PLEASE!

Thanks for your interest,

Randy Anderson

Principal, CA Landscape Architect #2223
